

REMARKS

The above amendment is submitted for meeting the requirements of consistency between drawings and the specification. The applicant appreciated the Examiner's "Notice of Drawing Inconsistency with Specification". Accordingly, in this amendment paper the specification is amended for listing FIG. 10h and FIG. 10i in the "Brief Description of the Drawings" section. For further clarifications of FIG. 10h and FIG. 10i, descriptions of FIG. 10f and FIG. 10g on page 18 lines 9-12 are amended for correcting the descriptions of disk actuator positions. In addition, on page 38 line 6 the sentence is amended for indicating two dispensing positions by naming dispensing positions with reference to specific elastic button being depressed by the disk actuator. All of these amendments are for more clear descriptions of the functions of the disk actuator.

Your allowance of the amendments is respectfully requested.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Youti Kuo", followed by a long, horizontal, wavy flourish.
